Action Taken on Feed Back of Students

Sl. No.	Feedback/Suggestion	Action Taken
1.	There should be facility of smart classes and more interface between industry personnel and students.	Smart classes have been established in each college for effective teaching and learning. As per curriculum of all the degree program, students are attached with different industries for 01 month under RAWE, RHWE and FOWE programme. Interface between industries and students are being organized through training and placement.
2.	Non-teaching staffs for the departments and lab field works are needed to improve the academic and research activities.	Non-teaching staff positions have been placed for approval from Govt of Uttarpradesh.
3.	All India tour incorporated in syllabus and mandatory for all UG,PG and Ph.D students for better understanding the agriculture	All India tour for UG students is regularly done.
4.	The writing skills of students are very poor and its not possible for a single language teacher in the university to solve the issue, in every college there must be an language teacher appointed who can take care of this.	There is English teacher for english language course and one English Language Club has been established for students of poor english background.
